Gold given to karigars is tracked on trust, and disputes follow.

Today: a notebook or slip, wastage agreed verbally, deadlines chased by phone, accounts settled at month end.

Unexplained gold, demo order

0.500 g

Illustrative demo figure, not field data.

TO FILL AFTER INTERVIEWS

One quote from a karigar or jeweller, exact words, with consent (docs/FIELD.md).

WHAT WE HEARD

What the organisers say it costs, and what our interviews add.

From the problem statement

- Unexplained gold losses
- Soured relationships
- Missed wedding dates
- Artisans waiting weeks to be paid

Hard part: accuracy to the gram, one record both sides accept, and fairness to the karigar, who has less power.

Language they want first: __

THE WORKING DEMO · ILLUSTRATIVE DATA

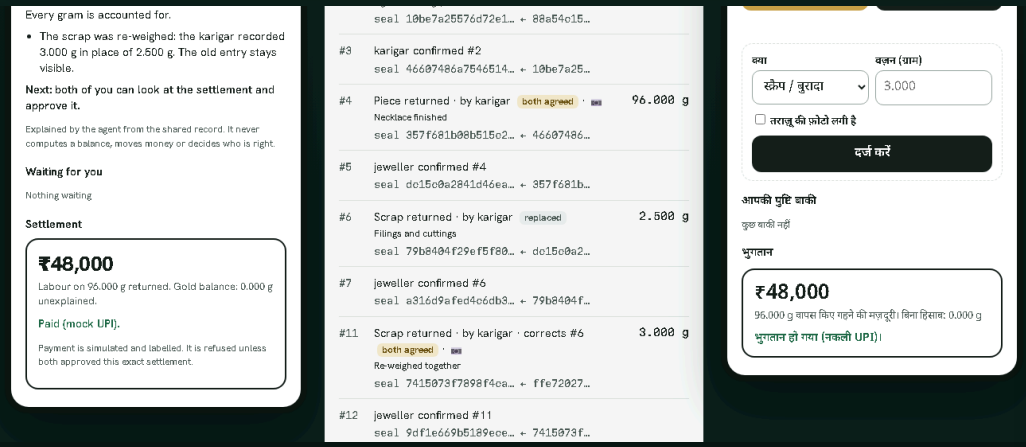

One shared record, from gap to payment.

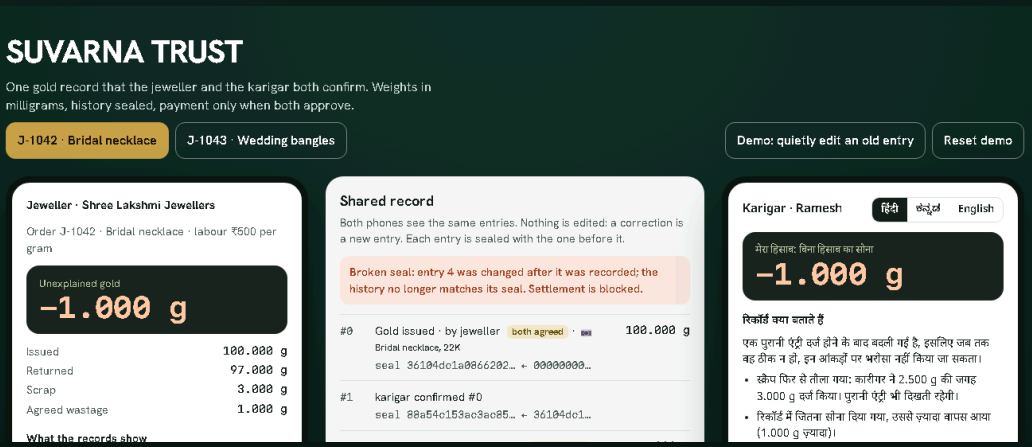

1 100 g issued, 0.500 g unexplained. The scrap has no scale photo.

2 Re-weighed with a photo as a new entry. Gap: 0.000 g.

3 Both approve the exact settlement. Then mock UPI pays.

4 Quietly edit an old entry: the seal breaks, payment is refused.

Runs today: github.com/thegoodengineers/suvarna-trust

WHY BOTH SIDES TRUST IT

Nothing can be quietly changed, and no one is paid without both saying yes.

Milligrams, not guesses

Whole milligrams in tested code. The AI never computes a balance.

A seal on every entry

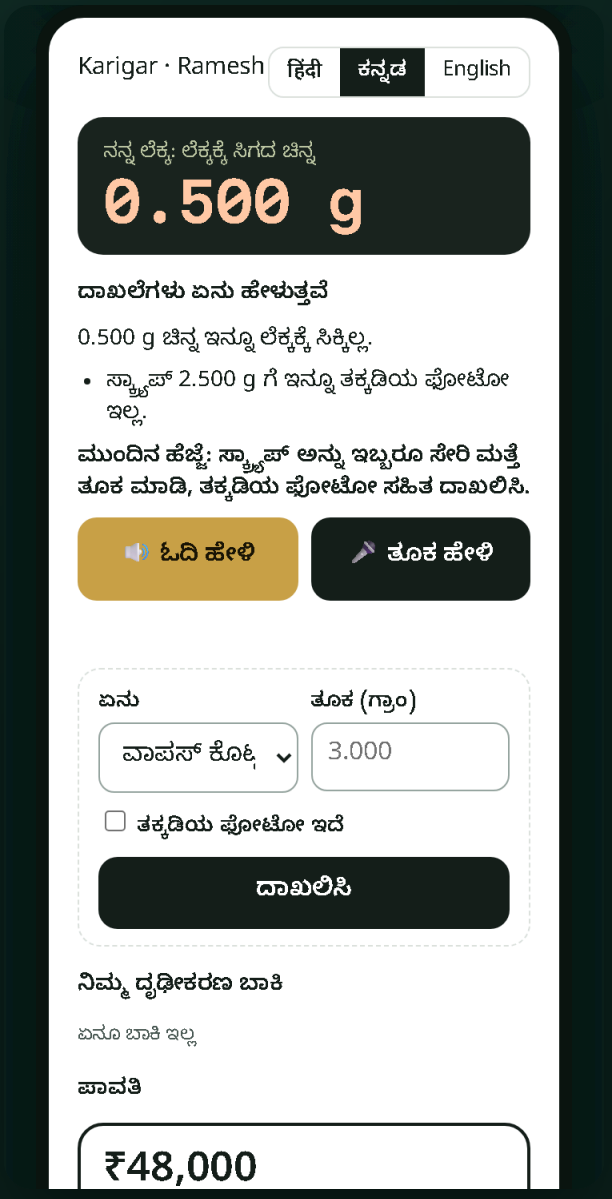

Each entry carries the hash of the one before. Corrections are new entries.

Two approvals

Payment needs both sides to approve one exact settlement, nothing unexplained.

An agent that explains

Kannada, Hindi or English, without blame. It suggests; people decide.

BUSINESS MODEL AND JOBS

Jewellers pay. Karigars use it free, and own their record.

Jeweller subscription

Monthly, per shop. Pays for the shared record, reconciliation and the agent.

FROM INTERVIEWS
Price jewellers called fair: __

Trust Passport

With the karigar's consent, his verified work record helps lenders and new jewellers trust him. Referral fee.

Assisted path

JanAI Café operators help karigars without a smartphone and earn per assisted transaction.

Jobs and livelihoods

Karigars paid faster and losing fewer disputes; a verified record helps skilled karigars win new work and credit for tools; operators get a paid local role. Growth goes market by market, because jewellers in one market share the same karigars.

No market-size figures until we can source them

TEAM AND PROTOTYPE PLAN

The Good Engineers

Chirag · ledger core and submission
Bhumika · karigar phone, Kannada, design
Ayush · field interviews, evidence
Abhijeet · agent and architecture

If shortlisted (23 Nov), by 15 Dec

- Separate jeweller and karigar logins, offline-first sync
- Scale-photo reading, proposed by the agent, confirmed by people
- Deadline alerts and the karigar's Trust Passport
- JanAI Café assisted path with the karigar's own voice "yes"

We will measure, not claim: gaps caught, time to settle, payments made without both approvals (target zero).

RUNNING TODAY

- Milligram ledger with tests
- Sealed history
- Two-approval mock UPI
- Agent in Kannada, Hindi, English
- Voice read-aloud and entry
- Deadline warnings
